

## FaciliWorks® 8i Calibration Is Now Available

CyberMetrics Corporation, world-wide leader in calibration and enterprise asset management, announces FaciliWorks® 8i Calibration, delivering an enterprise asset management solution that can be extended to include quality calibration management support for customers in regulated industries.

Phoenix, Arizona – February 8, 2010 – CyberMetrics Corporation announced today that it has released FaciliWorks 8i Calibration for its FaciliWorks 8i Enterprise Asset Management family of server and web-based management solutions.

FaciliWorks 8i Calibration brings together the power of the world's leading calibration management software product, GAGetrak® with FaciliWorks 8i to deliver a total Enterprise Asset Management & Calibration all-in-one solution. This allows customers to more efficiently manage calibrations, assets, work orders, inventory, purchase orders and related reporting, charting and analytics across the enterprise.

“FaciliWorks 8i has been successfully deployed in virtually every major regulated industry and has been particularly successful in helping FDA regulated companies comply with 21 CFR Part 11 requirements,” said CyberMetrics Asset Management Division President, James Saxon. “The new FaciliWorks 8i Calibration builds on our proven record of enabling customers to satisfy ISO standards and FDA regulatory requirements. It can be licensed as an onsite server or as a hosted service and is generally available.”

FaciliWorks 8i Calibration automatically generates Calibration Due work orders along with Scheduled Preventative Maintenance and Unscheduled work orders. Managing and completing a calibration order becomes simplified with web and hosted based calibration requests and Internet Explorer access from any high speed Internet connection.

With support for predictive maintenance & web calibration requests, an organization can now manage a more tightly integrated process. FaciliWorks 8i also supports data integration from ERP, Accounting and Inventory systems as well as electronic data received from sensors, meters and SCADA data. Accessible from Internet Explorer, Smartphone mobile devices, PDAs or Netbooks, FaciliWorks 8i is now easy to centrally deploy and administer as an enterprise-wide asset management & calibration system across multiple sites from a single web server.

Founded in 1988, CyberMetrics Corporation is privately held with more than 10,000 customers world-wide. For more information, visit [www.cybermetrics.com](http://www.cybermetrics.com), call 1-800-776-3090 or [click here](#) to see the February 2010 FaciliWorks Express newsletter.
