FOR IMMEDIATE RELEASE

**CyberMetrics Announces Release of First Web Based Facility
Maintenance Management Application, FaciliWorks 6i**

*CyberMetrics releases new version of its Facility Management CMMS software suite
FaciliWorks 6i, the company's first web based application suite.*

SCOTTSDALE, Ariz. – June 27th, 2004 – CyberMetrics Corporation, a leading provider of quality asset management and industry compliance solutions has released FaciliWorks 6i the company's first web based facility management application.

“Earlier in the year we announced the release of GAGEtrak 6.0 and today we announce the official release of FaciliWorks 6i – a true web based facility management application that provides valuable features requested by the market place with flexible pricing.” Said Perry Parmely, director of sales and marketing of CyberMetrics.

“While there is a growing list of CMMS Facility Management vendors in the market, CyberMetrics has a long legacy of listening to the market and servicing clients; the market was asking for a robust feature rich, web based facility management application and we delivered!”

FaciliWorks 6i provides employees with the ability to search work orders quickly and with greater ease reducing the cost and time associated with manual work order management and fulfillment.

Through FaciliWorks 6i, organizations are able to more efficiently allocate labor resources and prioritize work orders to improve productivity through work order change management features within the application reducing overtime costs due to manually researching work order details and status.

FaciliWorks' electronic signatures and audit trail enables organizations to have electronic records and electronic signatures accepted as equivalent to corresponding paper records addressing critical industry and governmental compliancy requirements.

Like all CyberMetrics quality products, FaciliWorks scales with your organization, from a single user on one computer to several users on a local area network; if you have many users or a large database you may want to consider FaciliWorks Client/Server.

About CyberMetrics Corporation

CyberMetrics Corporation is a leading provider of quality asset management and industry compliance solutions to over 10,000 companies world wide such as Allied Signal, Amgen, B.F. Goodrich, Honda, Johnson & Johnson, Nissan, Ford, 3M, Proctor & Gamble. CyberMetrics solutions reduce the risk, cost and time of facility management and gage calibration.
