FOR IMMEDIATE RELEASE

CyberMetrics Corporation reports record sales of its GAGetrak Calibration Management Software for 2007!

SCOTTSDALE, Arizona – January 31, 2008

CyberMetrics Corporation, a privately-held software and solutions provider founded in 1988 and located in Scottsdale, Arizona, reports that it achieved record yearly sales for its GAGetrak Calibration Management Software product line in 2007. This is the second consecutive year of all-time sales for GAGetrak, the flagship franchise in which CyberMetrics was originally founded.

During 2007, in response to changing customer & market needs, CyberMetrics unveiled a three-tier GAGetrak product line.

“The GAGetrak franchise is experiencing tremendous sales growth and is well positioned for achieving future sales results greater than those already achieved”, states Larry Bagan, President, Quality & Calibration Products Division of CyberMetrics.

“The creation of three distinct software products within the GAGetrak franchise has allowed CyberMetrics to better meet the needs of the marketplace and to expand our presence within all market segments of the calibration management market”, notes Bagan.

With the creation of multiple GAGetrak products and the sales increases which have resulted, GAGetrak’s position as the number #1 installed calibration management software solution in the world has strengthened.

“We continue to reach out to our customers and the calibration management marketplace. The position of market leader comes with huge responsibilities and expectations; CyberMetrics is committed to meet and exceed the demands of the marketplace”, adds Bagan.
