

# FaciliWorks 7

## Desktop Maintenance Management Software

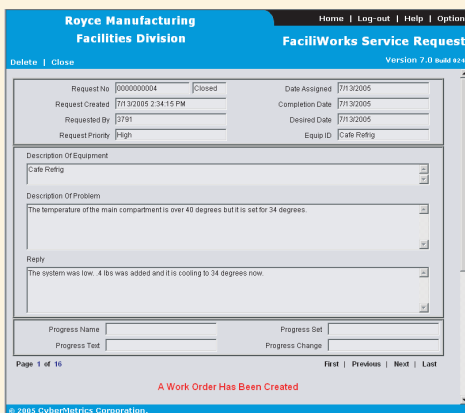

### Your Robust Desktop CMMS solution!

Efficiently manage your workload, reduce maintenance costs, and improve your company's maintenance management program with FaciliWorks 7 Desktop.

Easy to install and use, FaciliWorks 7 Desktop helps you to improve the reliability of your maintenance management program, while optimizing inventory and purchasing functions, to provide your company with a competitive advantage. FaciliWorks 7 Desktop allows your company to smartly implement standards and achieve and maintain industry and vendor compliance.

FaciliWorks 7 Desktop provides you with the benefits of efficiently managing your company's maintenance management program through the use of our comprehensive, yet easy to use, computerized maintenance management software (CMMS) solution.

### FaciliWorks Benefits:

- Reduce Maintenance Costs
- Optimize Inventory & Purchasing
- Implement Standards & Compliance
- Store & Retrieve Records
- Improve Maintenance Management Program Reliability
- Scalable to meet future needs
- Web Service Request module provides submission of service requests throughout your facility, via the Internet

The Web Service Request module expands your desktop FaciliWorks software solution throughout your facility. Service Requests may be issued via the Internet; the service requests go directly to your FaciliWorks desktop software and do not require additional FaciliWorks desktop licenses. Enjoy the advantages of desktop functionality along with web service request flexibility.

## FaciliWorks Features:

FaciliWorks 7 Desktop tracks and coordinates employees, suppliers, tools, parts, procedures, budgets, and purchasing. Customizable reports allow you to analyze and stay ahead of trends, providing valuable management assistance in improving the over-all reliability of your maintenance management program and achieving your maintenance goals.

Comply with international and vendor standards, achieve and maintain 21 CFR Part 11 compliance; FaciliWorks 7 Desktop enables your company to be more competitive in an ever-changing, competitive world. FaciliWorks 7 Desktop is easy to install and very secure, providing IT with a confident and seamless maintenance software solution. FaciliWorks 7 Desktop is easy to manage and operate, providing end-users with an efficient and practical maintenance software solution.

FaciliWorks 7 Desktop is designed to grow with your organization, from a single user on one computer to several users on a local area network. FaciliWorks 7 Desktop provides a Client/Server application to accommodate the largest of data bases and the addition of many more users.

If you're involved in facilities and plant maintenance, FaciliWorks is the proven, comprehensive, efficient, and easy to use Computerized Maintenance Management Software (CMMS) solution to fulfill your company's maintenance management needs!

CyberMetrics provides live technical support, consultation & implementation services, and customized on-site, or regional (classroom) training to ensure your company's successful implementation and utilization of FaciliWorks 7 Desktop.
