

SUPPLIERtrak[®]

SUPPLIER QUALITY ASSURANCE SOFTWARE

How well do you know *your* supplier?

From tainted cat food to contaminated beef to rejected raw materials, can your company afford the risk of a bad supplier?

SUPPLIERtrak is the most comprehensive software that you'll find to track, analyze, and monitor your company's suppliers. SUPPLIERtrak maintains a complete database of all your suppliers and the parts they supply your company. On-line procedures can be maintained for easy reference and inspections. Receiving records allow you to log all incoming inspection results, such as quantity received, quantity inspected, lot number and other pertinent information. If desired, you can print "accept" or "reject" tags or even issue a rejection notice (with corrective action).

SUPPLIERtrak allows you to generate performance reports on any supplier, for any time frame. Maintain records on supplier ratings and supplier surveys to stay informed of your supplier's quality status. Rating and survey categories are completely user-definable to comply with your company's specific rating methods.

Flexible and easy to use, SUPPLIERtrak is the most powerful tool you'll find to accurately track, analyze and monitor your company's suppliers. The benefits that SUPPLIERtrak provides will make your company more competitive, will enable your organization to work faster, and will make your business smarter.

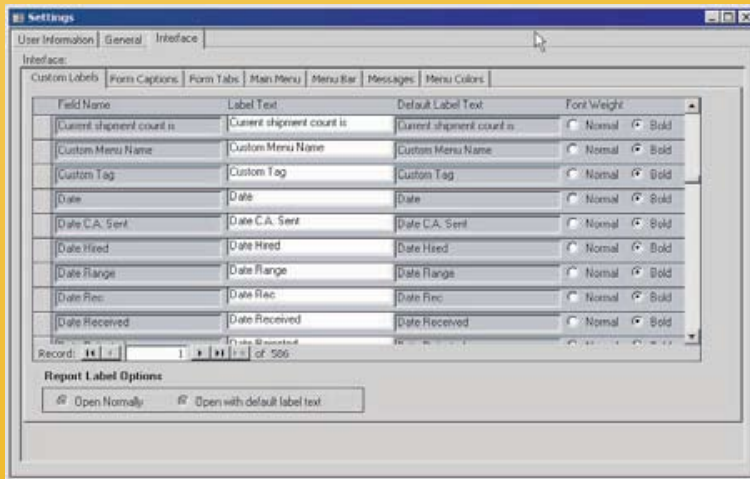

Benefits:

- Identifies your best-and worst performing suppliers
- Provides perpetual monitoring of supplier quality
- Eliminates the costs and errors of manually tracking suppliers
- Maintains costs of rejections, reworks, and sorting
- Quantitatively measures supplier quality
