FOR IMMEDIATE RELEASE

CyberMetrics Sets All-Time Quarterly Sales Record

SCOTTSDALE, Arizona—July 7, 2006

CyberMetrics Corporation, a privately-held software and solutions provider founded in 1988 and located in Scottsdale, Arizona, achieved an all-time quarterly sales record during Q2, '06.

Sales of CyberMetrics' software, training, and services rose 17.7% over the second quarter of last year, eclipsed the company's previous best quarter (Q1, '05), and beat most analyst's expectations.

"Strong demand for GAGetrak (Calibration Management Software) continues ahead of our upcoming new product release. GAGetrak sales have been at or near all-time highs the entire year and we see no slowdown in sight", states Larry Bagan, CyberMetrics' Chief Operating Officer.

"The release of our newest and third product line, SUPPLIERtrak (Supplier Quality Management Software), has generated great interest and sales ahead of our original projections. Interest in the upcoming release of the web-based FaciliWorks version 8i (Maintenance Management Software) has picked up recently as well" notes Bagan.

For the fiscal year ending '06, CyberMetrics "is on pace to achieve all-time sales and the largest earnings improvement in company history", adds Bagan.
